

The DAFFODIL

private studio | 1 bath | 240 square feet

The Daffodil is a spacious living space designed for easy maneuverability with visual cues for day-to-day living. It is our goal to provide residents with satisfying lives, however different the course of their lives have become with cognitive impairment. Our residents are unique individuals who are deserving of our careful attention to their remaining strengths, which we will cultivate. Their apartment and social areas are designed with those goals in mind. Each resident is encouraged to bring personal furniture and belongings to add their own personal touch and make this their new home.
